Eduardo Escallón

Chief Technology Officer | Systems Engineer

Barranquilla, Colombia | eduard.escallon@gmail.com | +57 300 760 9535 | linkedin.com/in/eduardoes

PROFESSIONAL SUMMARY

Systems Engineer with a Master's in Web Site Management and Engineering, a specialization in Project Management and over 13 years of software development experience. Today I lead all digital and technology areas at Aleati and the creation of its software projects. Expert in React.js, Next.js, TypeScript and Redux, with solid backend experience in PHP (Symfony) and Node.js, API integration and performance optimization. I have led teams and projects with agile methodologies, focused on results, code quality and scalability.

PROFESSIONAL EXPERIENCE

Chief Technology Officer | Aleati Espacios Comerciales S.A.S.

Aug 2025 - Present | Colombia | Remote

- I lead the company's digital and technology area end to end: strategy, infrastructure, tools and digital channels.
- I design, build and maintain an internal administrative application that centralizes and manages all of the company's processes.
- I manage software projects from start to finish: requirements, architecture, development, deployment and support.
- I make the company's technology decisions.

Frontend Developer | Candelasoft

Aug 2025 - Present | Bogotá, Colombia | Remote

- I develop a mobile chat application in React Native.
- I design the architecture of React frontend applications so they are scalable, sustainable and easy to maintain.
- I optimize web performance to achieve fast load times and a smooth experience across devices.
- I build intuitive, responsive interfaces in collaboration with multidisciplinary teams.

Development Lead | Browser Travel Solutions

Apr 2021 - Jul 2025 | Bogotá, Colombia

- I led the development of several web portals with React.js, server-side rendering with Next.js and state management with Redux.
- I built a chatbot for MilesCarRental.com and Viajemos.com with TypeScript, React, Dialogflow and Symfony, improving customer service by 35%.
- I implemented new features and maintenance on systems built with Symfony, React and Magento, with high performance and stability.

Senior Web Developer | Browser Travel Solutions

Jun 2018 - Apr 2021 | Bogotá, Colombia

- I built and maintained websites in Magento 1.9, Symfony and React.js for international markets.
- I optimized deployment processes, reducing production errors by 75%.

Junior Project Engineer | SEL Engineering

Feb 2016 - Jun 2018 | Bogotá, Colombia

- I integrated ASP.NET applications and delivered the developments requested by the Colombia office.
- I built an internal advertising management system for multiple screens, administered from a dashboard.
- I documented new features, setting a uniform standard for the development team.

Development Coordinator | Araujo y Segovia

Jun 2014 - Feb 2016 | Cartagena, Colombia

- I managed the backend development of the Sifinca 2.0 software with PHP, Symfony 2 and Node.js.
- I made sure requirements were implemented on time and with quality.

Development Assistant | Araujo y Segovia
Dec 2012 - Jun 2014 | Cartagena, Colombia

- I analyzed and built requirements for Sifinca 2.0, improving the system's stability and scalability.
